

HERMES

Data Exchange Platform

Advanced Design of the HERMES
Data Exchange Platform Supporting the Cyber Defence
of Autonomous Military Systems

This project has received funding from the European Defence Industrial Development Programme (EDIDP), under Grant Agreement "EDIDP-SME-2020-099-HERMES"

Overview

HERMES aim is to fully design and deliver the so called 'HERMES Data Exchange Platform (DXP)', addressing different challenges relating to automation in cybersecurity and information sharing. Based on Common Requirements agreed by the participating Member States during the studies phase, the project will also demonstrate the HERMES system's key features and technologies, targeting the area of "cybersecurity solutions for the protection of future security and defence systems".

Through engagement with participating Member States and stakeholders, the project will validate the underlying novel approach proposed to address the need for cyber resilience in autonomous military systems. This project brings together three SMEs with expertise in software development and cybersecurity for the full technical design of an advanced cybersecurity information management system, the HERMES DXP.

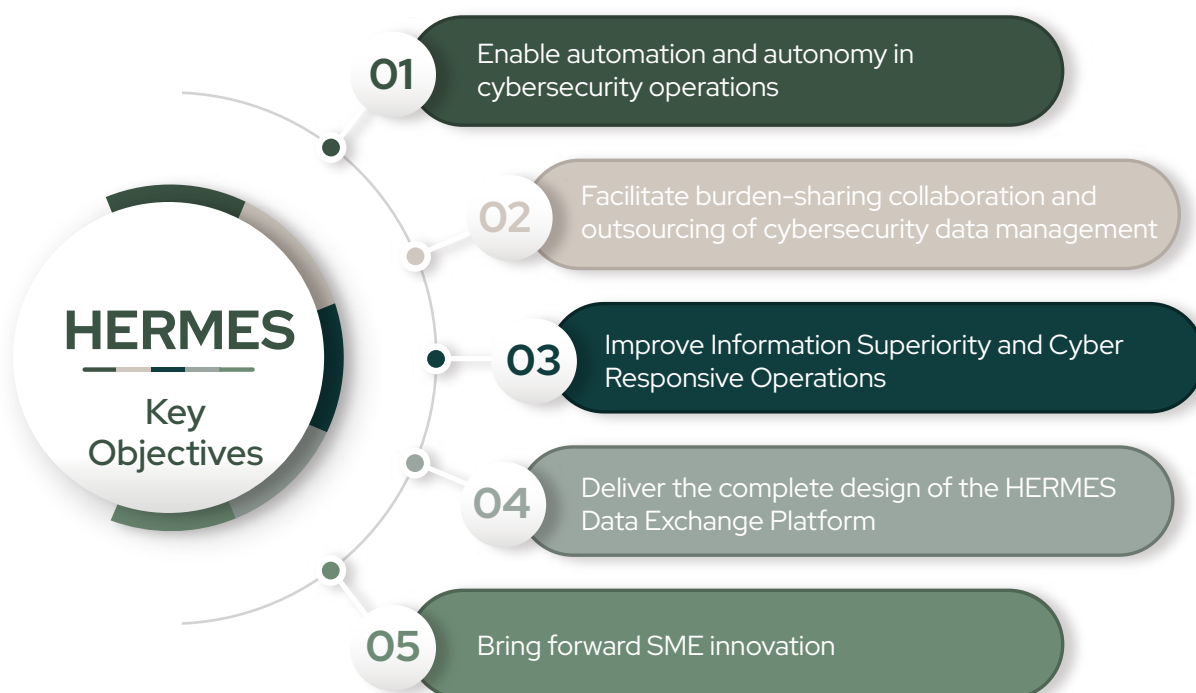

Project's Info	
Project Identifier	EDIDP-SME-2020-099-HERMES
Programme	European Defence Industrial Development Programme (EDIDP)
Duration	33 months
Start date	01/12/2021
Total budget	2,499,780.00€ (100% EC funded)
Coordinator	eBOS (Christos Skoufis)

Coordinator

eBOS

Consortium

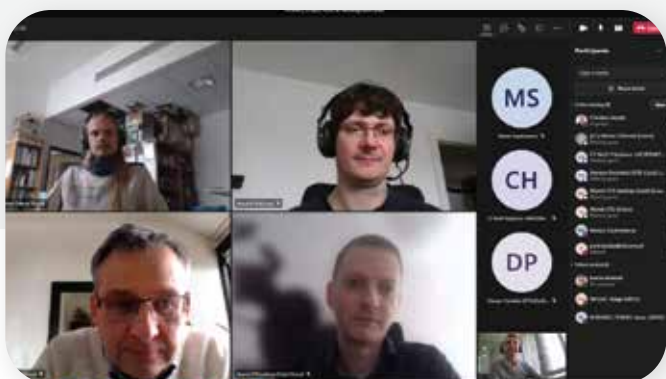

ITTI 

Meetings

In the past seven months, the kick-off meeting as well as the first plenary meeting & Mission Definition Review (MDR) took place, hosted by the Project Coordinator, Christos Skoufis (eBOS), to review the project's progress, and outline the roadmap ahead.

HERMES kick-off meeting 10th December 2021

HERMES Plenary Meeting & Mission Definition Review (MDR) 15th June 2022

Events participation

1st Euro-Mediterranean Forum, EUROMED (July 6th 2022)

EUROMED was organised by the French armament procurement agency (DGA, Direction Générale de l'Armement) and took place in Toulon, France. The event's focus was the creation of winning consortia in the context of the European Defence Fund (EDF).

HERMES's overall and key objectives were presented at EUROMED to more than 80 participants from France, Croatia, Cyprus, Greece, Italy, Malta, Portugal, Slovenia and Spain. The participants had the chance to hear more about the project and its focus on the design of the HERMES Data Exchange Platform for the Cyber Defence of Autonomous Military Systems.

Information Material

HERMES's information material is now available at the project's website.
